

# Shortblocks for Gas Engines

Repair solutions for gas engines

## Repair solutions for gas engines in the global „Independent Aftermarket“

The amount of gas engines and combined heat and power plants worldwide have increased rapidly during the past years. By now, these engines and aggregates have reached runtimes of several 100.000 km or several 10.000 operation hours.

**For upcoming repairs and technical inspections, the replacement of the entire engine is not implicitly necessary.**

OE Germany can provide an alternative:

### OE Germany Gas-Shortblocks

Shortblocks are pre-assembled crank drives comprising engine block, crankshaft, connecting rods, plain bearings, pistons, cylinder liners, camshaft, valve tappets, various small parts and optional cylinder heads.

With our range of shortblocks you can repair current and well-proven MAN engine ranges:

- **E 2842 E/LE 302/312/322**
- **E 2848 LE 322**
- **E 2876 LE 202/302/TE 302**
- **E 0836 LE 202**

### Quality

Our shortblocks are assembled according to the guidelines and tolerances of engine manufacturers. We only use quality-tested new parts for our products. They are based on the tried and tested components of OE Germany Handels GmbH including plain bearings and pistons from renowned European producers.

We assemble individual shortblock solutions according to your requirements. We determine the precise engine specifications from your vehicle identification number (VIN) and/or your engine number. Our assembly personnel is highly trained and experienced in engine construction.

**We assemble our shortblocks in Germany!!**

### Efficiency

Low-wear components, such as oil sumps and manifolds, can always be reused, as well as conventional replacement products such as injection pumps or turbochargers.

**You purchase a new globally competitive quality product from your specialist OE Germany!**

### Time Savings

Shortblocks guarantee in-time rapid repair solutions. No more time-consuming reconditioning of old parts. No long procurement lead times for all parts which you require for conventional repairs. No annoying searches for used engines or parts.

**You avoid downtimes. Your engines are up and running again in next to no time and you can redeploy your vehicles and power units fast.**

### Service

Reliable preservation and packaging and customized transport solutions, even international shipment, are part and parcel of our daily business.

**On request, we can also supply you with additional spare parts for your specific repair solution.**

**Our team is looking forward to receive your inquiry under specification of the relevant engine number!**
